Fatima Rehan

fatimarehan029@gmail.com github.com/fatima-rehan linkedin.com/in/fatima-rehan29 fatima-rehan-portfolio.vercel.app

SKILLS

- **Languages:** Java, Python, JavaScript, SQL, C, Bash, HTML/CSS
- **Frameworks/Libraries:** Spring Boot, React.js, Next.js, FastAPI, Flask, Three.js, Tailwind CSS, TensorFlow.js, Leaflet
- **Databases & APIs:** PostgreSQL, Supabase, Firebase, REST APIs, Gemini API
- **Tools & Systems:** Git, GitHub, Linux/Unix, Jira, JUnit, Vercel, Render, Figma, Vite

EDUCATION

Bachelor of Science, Computer Science (Co-op), Toronto Metropolitan University *Expected April 2029*

- **Relevant Courses:** Computer Science I & II (Python & Java), Data Structures & Algorithms, Systems Programming in C & Unix, Web Development, Human-Computer Interaction, Probability & Statistics, Discrete Math

WORK EXPERIENCE

AI Data Trainer, Cohere *Feb 2025 – Aug 2025*

Toronto, ON

- Helped launch **Command A Vision**, Cohere's first commercial model that understands images alongside text, by annotating and labeling the **multimodal** datasets used to train it
- Contributed to **iterative improvements** in model accuracy and coherence by evaluating and correcting outputs to a strict style guide
- Produced high-quality training data for **supervised machine learning** by **prompt engineering** and labeling text and image data

Code Sensei, Code Ninjas *May 2023 – Aug 2024*

Toronto, ON

- Made **object-oriented programming**, **data structures**, and **algorithms** approachable for young learners, helping them build their own games, by delivering personalized, project-based lessons in **JavaScript** and **C#**
- Contributed to increased program registrations by keeping engagement high across **5+** coding camps of **20+** students each through hands-on lessons in **game mechanics**, **scripting**, and **problem-solving**

PROJECTS

CafeCorder | Personal Project | Website Link *Oct 2026*

- Turned a **Java** object-oriented project into a full-stack web app by adding a **React.js** frontend and a **PostgreSQL** database
- Kept the app live by deploying a **Spring Boot** backend to the **cloud** on Render with a **cron job** and documented **REST APIs**
- Ensured reliable core features by designing the schema, writing **SQL** queries, and **testing integration** with **JUnit unit tests**

Argus | Mac-a-thon, McMaster University | Website Link *Feb 2026*

- Surfaced early-stage government opportunity signals by building a full-stack platform with **Next.js**, **React.js**, and **FastAPI**
- Ranked startups against relevant signals by implementing AI matching with **Gemini embeddings** and a weighted scoring formula
- Enhanced user engagement by engineering an interactive 3D globe with **Three.js** to visualize ranked signals

Gøøse | ***Hackathon Win*** **| Technova, University of Waterloo |** Website Link *Sep 2023*

- Won **"Best Use of Hedera"** out of **150** competitors for an **innovative solution** built through **teamwork** and technical excellence
- Optimized transaction speed by collaborating in an **Agile** team with **code reviews** to build a site automating **Hedera** transactions
- Delivered a responsive platform by building on an open source codebase with **React.js**, **Next.js**, Tailwind CSS, and Voiceflow

EXTRACURRICULARS

Computer Science Course Union, 3x Year Representative *Oct 2024 – Present*

Toronto Metropolitan University

- Voiced the concerns of **500+** computer science students, re-elected **3 years in a row**, by bridging communication between professors, TAs, and the course union to resolve student concerns
- Increased first-year student engagement, tracked through feedback form responses, by gathering requirements and building a **responsive website** consolidating first-year resources

Google Developer Groups, Corporate Relations Director *Sep 2024 – Present*

Toronto Metropolitan University

- Expanded funding and resources for student events by securing sponsorships through outreach to corporate **stakeholders**
- Helped grow the group to **2000+** members in one year, making it the **largest** developer group in Canada, by leading a sponsorship sub-team's networking strategy, email outreach, and communication
